Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 and 8-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Baldwin et al. (US 5,276,630).

Baldwin discloses a method of controlling HVAC system as below.

This embodiment is operable when the HVAC system 10 is configured as a heat pump system and when the reversing valve 12 is in the heat pump position. If the outside air temperature sensor 64 fails, the HVAC system 64 recognizes the invalidity of the sensor 64 and ceases the evaporator defrost module mode of operation automatically without the necessity of an operator command. If the outside air temperature sensor 64 comes back on line, the HVAC system 10 recognizes the validity of the defrost sensor 64 and automatically reconfigures itself to use the evaporator defrost module mode of operator without the necessity of an operator command. Thus, the HVAC system 10 always operates in the best available evaporator defrost module mode of operation.

Allowable Subject Matter

3. Claims 10-20 have been allowed.
4. Claims 5-7 have been objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Poth et al., Smith et al., Albanello et al., Hildebrand et al., Frey et al., Games et al., and Parker et al disclose related art.
